

Candidate: **Betty Penske**
Assessment: Sales Agent - Securities, Financial Services (Spanish)
Completed: May 4, 2024
Prepared for: Susan Bookman
HR Avatar Data Collection Account

Test Results and Interview Guide

The Sales Agent - Securities, Financial Services (Spanish) assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

Importance to Job ↑

Assessment Overview

This assessment provides scores for a number of important factors and competencies that are related to success on the job. Scores are presented based on their potential impact on job performance.

Scores are presented individually on a scale of 0-100. In most cases, including the overall score, higher scores represent higher expected job performance. However, for some competencies, either extreme low or extreme high scores indicate a risk of lower performance. Refer to the interpretation section of each competency for additional information.

Individual competency scores are also combined into a single overall score. Please note that individual competencies are weighted differently, depending on their type, and on fine adjustments based on data from the US Government's Occupational Data Network (O*Net).

Each competency measured includes one or more suggested interview questions, in an easy-to-use format. These questions should be used for additional probing, especially when the score shows an area of relative weakness.

Some of the competencies measured evaluate preferences for doing (or not doing) specific activities. Scores for these competencies can be used to evaluate job-fit.

We wish to emphasize that the data contained in this report should be used as part of a comprehensive process for evaluating job candidates. Additional data should include in-person interviews, job tryouts, resume review, and background checks.

Detail

Candidate:	Betty Penske, bettypenske@yourcompany.org
Assessment:	Sales Agent - Securities, Financial Services (Spanish)
Authorized:	May 4, 2024, by Susan Bookman, HR Avatar Data Collection Account, sue.bookman@richardson.biz
Started:	May 3, 2024, 8:04:46PM EST
Completed:	May 3, 2024, 8:04:46PM EST
Overall Score:	81

Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using HR Avatar's simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

Detail

Attention to Detail

Score: 91

Description:

This scale represents thoroughness, accuracy, and being concerned for all areas involved no matter how insignificant. Individuals who demonstrate high Attention to Detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details.

Interpretation:

High scores in this area correlate with superior performance for many jobs.

Able to achieve a high degree of thoroughness and accuracy in a work task. Concerned for all areas involved. Work products require little or no review or checking to maintain consistency.

Interview Guide

Deme un ejemplo de alguna ocasión en que haya descubierto un error que se pasó por alto, ya sea por usted mismo o por alguna otra persona que estaba trabajando con usted. ¿Qué hizo? ¿Cuál fue el resultado?

				
1	2	3	4	5
Ejemplo poco claro o inconsistente. No es capaz de describir qué fue lo que se pasó por alto. Sin acción alguna.	Ejemplo moderadamente claro. Cierta interés por los detalles. Acción directa pero pasiva.	Muy detallado. Interés por todos los componentes relevantes. Acciones claras y proactivas.

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit <http://www.onetcenter.org>.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Adaptable	82.1199	Z-Statistic	1.1413	2.7620
Situation Analysis in Selling	85.8569	Z-Statistic	1.3905	9.0237
Attention to Detail	91.0062	Z-Statistic	1.7337	15.2727
Emotional Self-Awareness	68.9776	Z-Statistic	0.2652	2.6846
Emotional Self-Control	63.1708	Z-Statistic	-0.1219	2.6846
Seeks Perfection	85.2367	Z-Statistic	1.3491	2.7970
Corporate Citizenship	10.0000	Z-Statistic	-3.6667	2.8254
Competitive	76.6892	Z-Statistic	0.7793	2.8378
Fundamental Sales Concepts	83.7170	Z-Statistic	1.2478	10.6552
Develops Relationships	65.6241	Z-Statistic	0.0416	2.0327
Enjoys Problem-Solving	83.1174	Z-Statistic	1.2078	2.6091
Empathy	67.5872	Z-Statistic	0.1725	2.0395
History Survey - Performance	78.3860	Z-Statistic	0.8924	7.9914
History Survey - Tenure	70.2345	Z-Statistic	0.3490	7.9914
Expressive and Outgoing	96.3193	Z-Statistic	2.0880	2.2871
Innovative and Creative	87.4931	Z-Statistic	1.4995	1.8647
Exhibits a Positive Work Attitude	65.7552	Z-Statistic	0.0503	2.9266
Analytical Thinking	98.2782	Z-Statistic	2.2185	15.8676
Writing	76.5713	Z-Statistic	0.7714	0.0499
Needs Structure	84.2264	Z-Statistic	1.2818	2.7970
Weighted Average of Competency Z-Scores:				1.1154
Mean applied to Raw Weighted Avg:				0.0000
Standard Deviation applied to Raw Weighted Avg:				1.0000
Normalized Raw Score:				1.1154
Mean:				65.0000
Standard Deviation Used:				15.0000
Final Overall Score:				81.7305
