Assessment: Agent - Purchasing (Spanish)
Completed: April 10, 2024
Prepared for: Susan Bookman
HR Avatar Data Collection Account

Test Results and Interview Guide

The Agent - Purchasing (Spanish) assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

A horizontal bar chart showing the distribution of responses for 'How often do you use the Internet?'. The x-axis represents percentages from 0 to 100. The bars are color-coded: red for 'Never', orange for 'Rarely', yellow for 'Sometimes', green for 'Often', and dark green for 'Always'. The 'Always' category is highlighted with a green background. A black triangle points to the 'Often' category.

Frequency	Percentage Range
Never	0 - 20%
Rarely	20 - 40%
Sometimes	40 - 60%
Often	60 - 80%
Always	80 - 100%

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

Importance to Job —

Assessment Overview

This assessment provides scores for a number of important factors and competencies that are related to success on the job. Scores are presented based on their potential impact on job performance.

Scores are presented individually on a scale of 0-100. In most cases, including the overall score, higher scores represent higher expected job performance. However, for some competencies, either extreme low or extreme high scores indicate a risk of lower performance. Refer to the interpretation section of each competency for additional information.

Individual competency scores are also combined into a single overall score. Please note that individual competencies are weighted differently, depending on their type, and on fine adjustments based on data from the US Government's Occupational Data Network (O*Net).

Each competency measured includes one or more suggested interview questions, in an easy-to-use format. These questions should be used for additional probing, especially when the score shows an area of relative weakness.

Some of the competencies measured evaluate preferences for doing (or not doing) specific activities. Scores for these competencies can be used to evaluate job-fit.

We wish to emphasize that the data contained in this report should be used as part of a comprehensive process for evaluating job candidates. Additional data should include in-person interviews, job tryouts, resume review, and background checks.

Detail

Candidate: Betty Penske, bettypenske@yourcompany.org

Assessment: Agent - Purchasing (Spanish)

Authorized: April 10, 2024, by Susan Bookman, HR Avatar Data Collection Account, sue.bookman@richardson.biz

Started: April 10, 2024, 8:02:08AM EST

Completed: April 10, 2024, 8:02:08AM EST

Overall Score: 78

Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using HR Avatar's simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

Minimum Qualification Guidelines - from O*Net

The following are suggestions from O*Net, the United States government's occupational information network, regarding prerequisites for this job type.

Item	
Educational Achievement	Bachelor's Degree
Job-Related Training	Less than 6 Months
Job-Related Experience	Less Than 1 Year

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit <http://www.onetcenter.org>.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Adaptable	66.9386	Z-Statistic	0.1292	3.4849
Attention to Detail	75.7622	Z-Statistic	0.7175	19.3602
Emotional Self-Awareness	66.3074	Z-Statistic	0.0872	3.3779
Emotional Self-Control	82.0927	Z-Statistic	1.1395	3.3779
Seeks Perfection	91.3888	Z-Statistic	1.7593	3.3930
Corporate Citizenship	10.0000	Z-Statistic	-3.6667	3.4937
Competitive	68.6550	Z-Statistic	0.2437	3.4743
Develops Relationships	65.5732	Z-Statistic	0.0382	2.6343
Enjoys Problem-Solving	80.5346	Z-Statistic	1.0356	3.4381
Empathy	72.4199	Z-Statistic	0.4947	2.5952
History Survey - Performance	78.9745	Z-Statistic	0.9316	9.6943
History Survey - Tenure	96.4657	Z-Statistic	2.0977	9.6943
Expressive and Outgoing	73.7646	Z-Statistic	0.5843	2.9618
Innovative and Creative	71.7648	Z-Statistic	0.4510	2.2726
Exhibits a Positive Work Attitude	85.4411	Z-Statistic	1.3627	3.6864
Analytical Thinking	92.9837	Z-Statistic	1.8656	19.6682
Needs Structure	71.7800	Z-Statistic	0.4520	3.3930
Weighted Average of Competency Z-Scores:				0.9281
Mean applied to Raw Weighted Avg:				0.0000
Standard Deviation applied to Raw Weighted Avg:				1.0000
Normalized Raw Score:				0.9281
Mean:				65.0000
Standard Deviation Used:				15.0000
Final Overall Score:				78.9211
