Betty Penske Pre-Hire Personality - First-Line Supervisor (Russian) April 28, 2024 Susan Bookman HR Avatar Data Collection Account

Test Results and Interview Guide

The Pre-Hire Personality - First-Line Supervisor (Russian) assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

Test-Taker Group	Percentile	0	10	20	30	40	50	60	70	80	90 1	100
Global	70th											
United States	58th										l	
HR Avatar Data	65th											

Assessment Overview

This assessment provides scores for 10 important personality factors that are related to success on the job. Scores are presented based on their potential impact on job performance.

Please note that personality tests, like this Attitudes, Interests, and Motivations survey ask the candidate to describe themselves. As a result, the results reflect how the candidate sees him or herself. In most cases, this equates to how the candidate actually behaves.

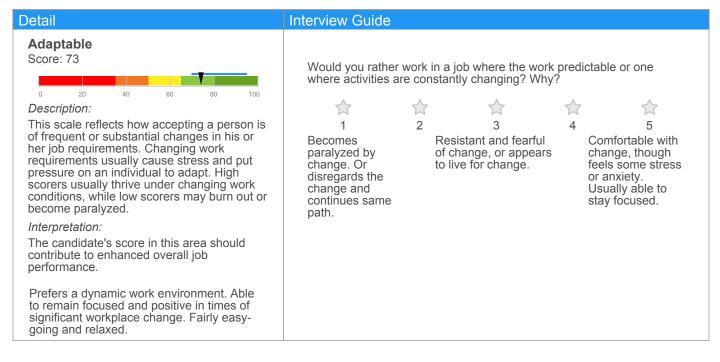

Remember also that scores on personality tests reflect behavioral tendencies and have no relationship with knowledge, skills or abilities.

Detail

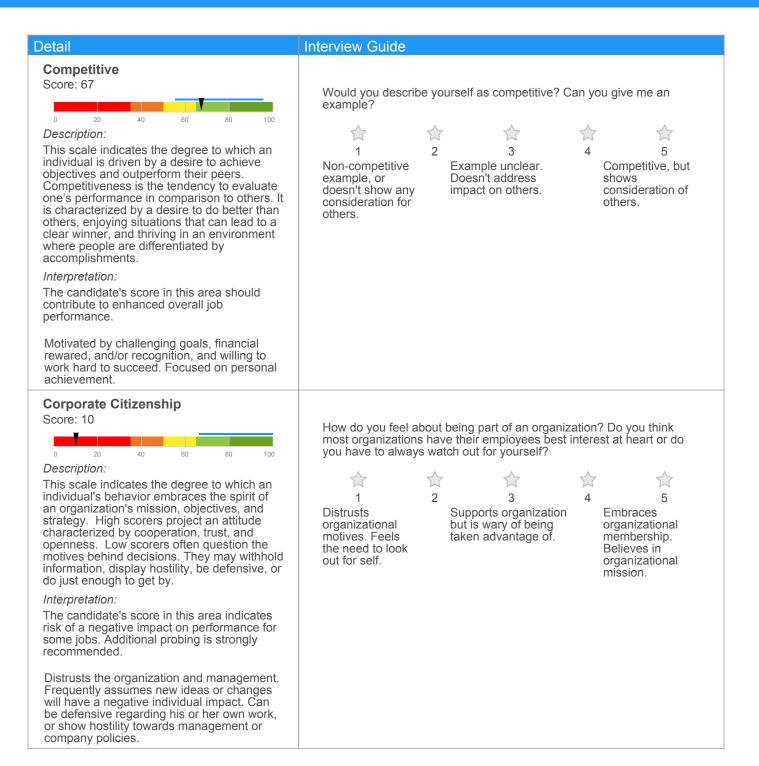

Candidate:	Betty Penske, bettypenske@yourcompany.org
Assessment:	Pre-Hire Personality - First-Line Supervisor (Russian)
Authorized:	April 28, 2024, by Susan Bookman, HR Avatar Data Collection Account, sue.bookman@richardson.biz
Started:	April 28, 2024, 3:09:11 AM EST
Completed:	April 28, 2024, 3:09:11 AM EST
Overall Score:	70

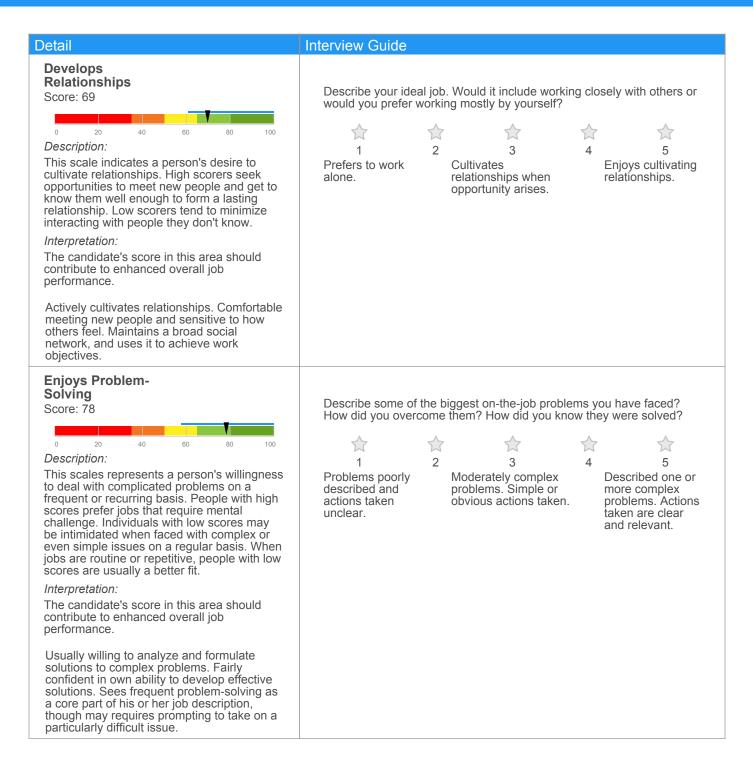

Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

Detail

Interview Guide

100

Seeks Perfection Score: 63

Description:

This scale indicates a person's desire for accuracy. People with high perfection scores are committed to meeting or exceeding standards for quality and take pride in the accuracy of their work. People with too little perfectionism may be sloppy and unconcerned with quality.

Interpretation:

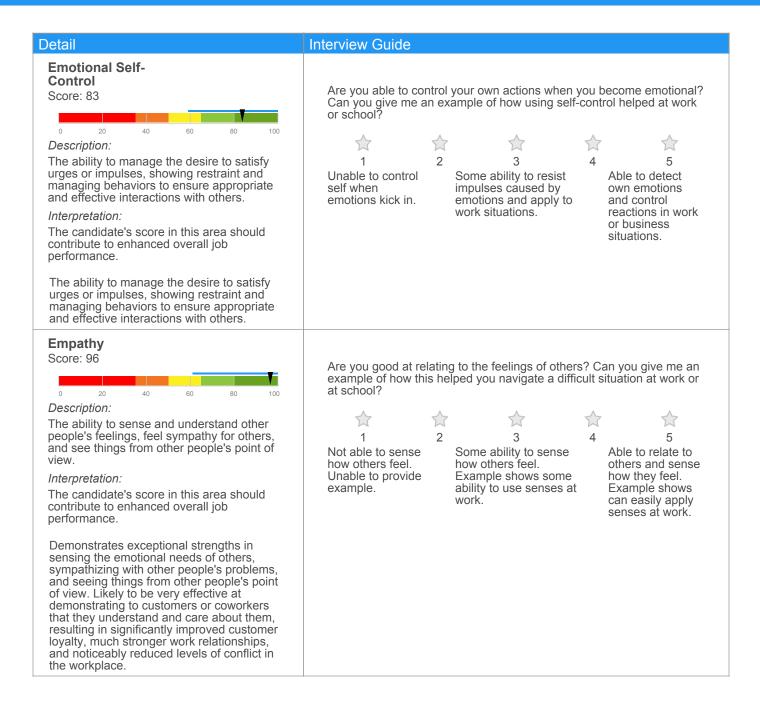

The candidate's score in this area indicates neither a positive nor a negative impact on performance.

Maintains high standards of quality but understands the need to work within schedule and resource constraints. While willing to compromise in order to balance these constraints, almost never allows quality to fall below an acceptable level. When you perform a task, how do you decide when it's good enough to consider it completed or 'ready' for the customer? Ŵ Ŵ 2 5 1 3 4 No emphasis on Balances quality with Insists on a high degree of quality quality. other constraints. before releasing work.

Emotional Intelligence Detail

This section contains a list of emotional intelligence characteristics that indicate how tuned in a candidate is to his or her own emotions, and those of others, as well as the candidate's ability to control his or her behavior in light of the emotions he or she is experiencing. These traits can often impact performance in groups or teams. Sample interview questions are provided to gather more information.

Detail	Interview Guide		
Emotional Self- Awareness Score: 87 20 20 40 60 80 100 Description: The ability to pay attention to, monitor, and understand how and why one reacts a particular way in different situations, and to know how to conduct oneself appropriately and effectively in social situations. Interpretation: The candidate's score in this area should contribute to enhanced overall job performance. Demonstrates exceptional strengths in maintaining awareness of his or her emotional reactions and behaviors and the potential impact of those behaviors on others, and an extremely high level of knowledge of what behaviors are appropriate for different situations. Likely to be very effective at identifying how his or her feelings may affect his or her behaviors and ensuring those behaviors stay focused and conform to social norms, enabling extremely appropriate, measured interactions with customers and coworkers.	How aware are you when your awarene 1 Not in tune with own emotions. Unable to improve decisions through awareness.	a of your own emotions? Can ess helped you make a better 2 3 Some ability to sense own emotions and control decision- making.	n you describe a time er decision? 4 5 Very in tune with own emotions. Able to improve decisions through awareness.

Identity Confirmation Photos

The following photos of the candidate and any identification were uploaded during the assessment session.

Photo Analysis Results	
- Risk:	Medium risk of cheating based on image inconsistencies
- Percent match among processed faces	100%
- Total images processed	17
- Total images with valid faces	14 (82%)
- Total pairs of faces compared	13
- Pairs in which faces matched	13 (100%)

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 50 (orange) equates to 1 to 2 standard deviation deviations below the mean. Similarly, a standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Adaptable	73.7930	Z-Statistic	0.5862	8.4675
Competitive	67.2516	Z-Statistic	0.1501	8.4156
