Test Results and Interview Guide

The Bank Teller (Spanish) assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Assessment Overview

This assessment provides scores for a number of important factors and competencies that are related to success on the job. Scores are presented based on their potential impact on job performance.

Scores are presented individually on a scale of 0-100. In most cases, including the overall score, higher scores represent higher expected job performance. However, for some competencies, either extreme low or extreme high scores indicate a risk of lower performance. Refer to the interpretation section of each competency for additional information.

Individual competency scores are also combined into a single overall score. Please note that individual competencies are weighted differently, depending on their type, and on fine adjustments based on data from the US Government's Occupational Data Network (O*Net).

Each competency measured includes one or more suggested interview questions, in an easy-to-use format. These questions should be used for additional probing, especially when the score shows an area of relative weakness.

Some of the competencies measured evaluate preferences for doing (or not doing) specific activities. Scores for these competencies can be used to evaluate job-fit.

We wish to emphasize that the data contained in this report should be used as part of a comprehensive process for evaluating job candidates. Additional data should include in-person interviews, job tryouts, resume review, and background checks.

Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using HR Avatar's simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

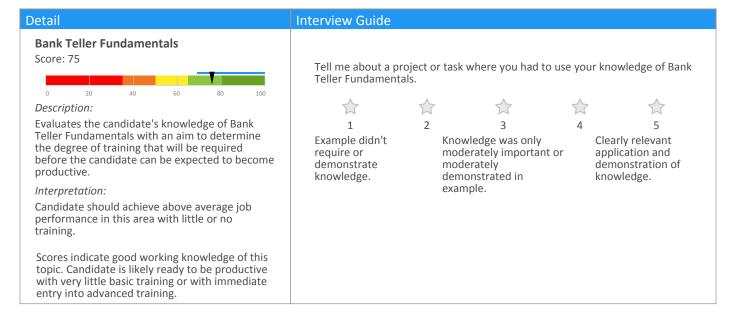

Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

Adaptable

Detail

Score: 63

Description:

This scale reflects how accepting a person is of frequent or substantial changes in his or her job requirements. Changing work requirements usually cause stress and put pressure on an individual to adapt. High scorers usually thrive under changing work conditions, while low scorers may burn out or become paralyzed.

Interpretation:

The candidate's score in this area indicates neither a positive nor a negative impact on performance.

Prefers a moderate amount of change in order to make progress. Feels too much change can be disruptive and undesirable. With coaching and reassurance is capable of remaining focused and positive throughout most change processes.

Interview Guide

3 Resistant and fearful of change, or appears to

live for change.

4

5 Comfortable with change, though feels some stress or anxiety. Usually able to stay focused.

1

Seeks Perfection

Score: 98

Description:

This scale indicates a person's desire for accuracy. People with high perfection scores are committed to meeting or exceeding standards for quality and take pride in the accuracy of their work. People with too little perfectionism may be sloppy and unconcerned with quality.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Highly intent on achieving perfection in work products and commitments. Willing to do whatever it takes to achieve the desired standard of excellence. Takes pride in having a reputation for quality.

When you perform a task, how do you decide when it's good enough to consider it completed or 'ready' for the customer?

Corporate Citizenship

Score: 10

Description:

This scale indicates the degree to which an individual's behavior embraces the spirit of an organization's mission, objectives, and strategy. High scorers project an attitude characterized by cooperation, trust, and openness. Low scorers often question the motives behind decisions. They may withhold information, display hostility, be defensive, or do just enough to get by.

Interpretation:

The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.

Distrusts the organization and management. Frequently assumes new ideas or changes will have a negative individual impact. Can be defensive regarding his or her own work, or show hostility towards management or company policies.

Interview Guide

How do you feel about being part of an organization? Do you think most organizations have their employees' best interests at heart or do you have to always watch out for yourself?

Distrusts organizational motives. Feels the need to look out for self.

3 Supports organization but is wary of being

taken advantage of.

4

Embraces organizational membership. Believes in organizational mission.

Competitive

Score: 71

Description:

This scale indicates the degree to which an individual is driven by a desire to impress their leaders and exceed their peers. Being competitive can either be damaging or useful, depending on the job. Competitive people spend much of their time thinking about themselves and the impact decisions may have on them, and their actions are often guided by these thoughts, which can either provide the drive needed to achieve a goal, or can damage the ability of a team to work together. In general, high scorers perform well in sales and related jobs.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Motivated by challenging goals, financial rewared, and/or recognition, and willing to work hard to succeed. Focused on personal achievement.

Would you describe yourself as competitive? Can you give me an example?

5

Develops Relationships

Score: 80

Description:

This scale indicates a person's desire to cultivate relationships. High scorers seek opportunities to meet new people and get to know them well enough to form a lasting relationship. Low scorers tend to minimize interacting with people

they don't know. Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Actively cultivates and maintains relationships. Able to quickly establish rapport with new acquaintances and accurately sense others' feelings. Maintains a broad social network and uses it to achieve work objectives.

Interview Guide

Can you describe a time when you had to choose between getting the job done or preserving a relationship with a friend or co-worker?

Places relationship above the work objectives in all or most cases.

Sometimes struggles between work and relationships, but usually balances well.

3

Focuses on getting the job done but

makes an effort not to hurt relationships.

Describe your ideal job. Would it include working closely with others or would you prefer working mostly by yourself?

Prefers to work

alone.

Cultivates relationships when opportunity arises or is necessary.

Enjoys cultivating relationships. Finds teamwork constructive.

5

Enjoys Problem-Solving

Score: 84

Description:

This scales represents a person's willingness to deal with complicated problems on a frequent or recurring basis. People with high scores prefer jobs that require mental challenge. Individuals with low scores may be intimidated when faced with complex or even simple issues on a regular basis. When jobs are routine or repetitive, people with low scores are usually a better fit.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Likes to analyze and formulate solutions to problems as a part of his or her daily work. Confidently accepts mental challenges. Optimistic that most problems can be resolved with effort and application. Describe some of the biggest on-the-job problems you have faced. How did you overcome them? How did you know they were solved?

Problems poorly described and actions taken

unclear.

3 Moderately complex problems. Simple or obvious actions taken.

Described one or more complex problems. Actions taken are clear and

relevant.

Expressive and Outgoing

Score: 71

Description:

There are many jobs that require outgoing personalities, such as selling, management, public relations, or jobs that require positive public contact. People who score high on expressiveness label themselves as outgoing and have many social contacts. Low scores indicate the person may not have the interest or willingness to assert themselves in social settings.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Likes to speak up in group meetings to insert or advocate new ideas. Enjoys asserting his or her own ideas among others.

Interview Guide

Passive in actions with others. Timidly speaks when addressed. Prefers listening. Speaks up and speaks out but doesn't need to be center of attention.

Likes to be center of attention.
Speaks confidently and volunteers opinions constructively.

Innovative and Creative

Score: 92

Description:

This scale indicates the degree to which the person considers themselves capable of formulating original approaches to problems and other work challenges. Individuals who score high on this scale are comfortable with jobs that require them to analyze situations and/or data, and use their imagination to identify alternative approaches to evaluate each to select the most effective solution. Lower scoring individuals prefer to follow a more cookie-cutter or predefined approach to dealing with a specific problem. When organizations expect their people to continually generate new and better ways of producing work, it is a good idea to hire people who share this interest.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Sees him or herself as creative and capable of generating novel or original solutions to issues or problems. Open to free-form discussion of different ideas.

What is the most creative solution you have ever come up with? What were the circumstances, and why do you think it was creative?

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the
 assessment is scored. As additional instances are completed, the comparative data may change. You can always update a
 report to the current values by clicking on "Recalculate Percentiles" within the online results viewing pages at
 www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit http://www.onetcenter.org.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.
