

Candidate: **Betty Penske**
Assessment: MS Excel PivotTables (Office 365)
Completed: July 27, 2024
Prepared for: Susan Bookman
HR Avatar Data Collection Account

Test Results and Interview Guide

The MS Excel PivotTables (Office 365) assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Overall

Candidate	Score	Interpretation
Betty Penske bettypenske@yourcompany.org MS Excel PivotTables (Office 365) July 27, 2024 Scores indicate a good working knowledge of PivotTables. Candidate is likely ready to be productive with little or no training for low to moderate complexity PivotTables.	69

Candidate: **Betty Penske**, bettypenske@yourcompany.org
 Assessment: MS Excel PivotTables (Office 365)
 Authorized: July 27, 2024, by Susan Bookman, HR Avatar Data Collection Account, sue.bookman@richardson.biz
 Started: July 27, 2024, 6:10:22AM EST
 Completed: July 27, 2024, 6:10:22AM EST
 Overall Score: 69

Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

Detail	Interview Guide
<p>PivotTables Score: 69</p> <p><i>Description:</i> Evaluates the candidate's understanding of PivotTables and ability to perform basic tasks using PivotTables in MS Office 365 Excel software.</p> <p><i>Interpretation:</i> Candidate should achieve above average job performance in this area with little or no training.</p> <p>Scores indicate a good working knowledge of PivotTables. Candidate is likely ready to be productive with little or no training for low to moderate complexity PivotTables.</p>	<p>Can you tell me about any education you may have that helped you grow your knowledge of MS Excel PivotTables?</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">★ 1 No relevant experience or education</div> <div style="text-align: center;">★ 2 Some relevance</div> <div style="text-align: center;">★ 3</div> <div style="text-align: center;">★ 4</div> <div style="text-align: center;">★ 5 Directly relevant experience or education</div> </div> <hr/> <p>Tell me about one time when you used a PivotTable. What did the PivotTable include?</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;">★ 1 Unable to provide an example of using a PivotTable or explanation is clearly incorrect.</div> <div style="text-align: center;">★ 2 Explains a mid level example of using a PivotTable.</div> <div style="text-align: center;">★ 3</div> <div style="text-align: center;">★ 4</div> <div style="text-align: center;">★ 5 Explains a high level example of using a PivotTable.</div> </div>

Identity Confirmation Photos

The following photos of the candidate and any identification were uploaded during the assessment session.

Photo Analysis Results

- Risk:	Medium risk of cheating based on image inconsistencies
- Percent match among processed faces	100%
- Total images processed	17
- Total images with valid faces	14 (82%)
- Total pairs of faces compared	13
- Pairs in which faces matched	13 (100%)

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- Sim ID: 14245-1, Key: 0-0, Rpt: 68, Prd: 5272, Created: 2024-07-27 11:10 UTC

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from each of the individual competency scores. First, all competency scores are calculated on a scale of 0-100. Note that some competencies use their color category rather than their actual numeric score in the overall calculation. For these, a standard score associated with the assigned color category is used in the overall score calculation rather than the actual numeric score. This is reflected in the "Score Value Used" column. Next, a weighted average of scores is computed using individual competency weights, typically set using job analysis data provided by the US Government Occupational Information Network (O*Net).

Competency	Score	How applied to overall	Score Value Used	Weight (%)
PivotTables	69.3035	Numeric Score	69.3035	100.0000
Weighted Average:				69.3035
Final Overall Score:				69
