

Candidate: Assessment: Completed: Prepared for: **Betty Penske** Technician - General Maintenance and Repair (Short) August 31, 2024 Susan Bookman HR Avatar Data Collection Account

Test Results and Interview Guide

The Technician - General Maintenance and Repair (Short) assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

Detail

Candidate:	Betty Penske, bettypenske@yourcompany.org
Assessment:	Technician - General Maintenance and Repair (Short)
Authorized:	August 31, 2024, by Susan Bookman, HR Avatar Data Collection Account, sue.bookman@richardson.biz
Started:	August 31, 2024, 5:45:58PM EST
Completed:	August 31, 2024, 5:45:58PM EST
Overall Score:	74

Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

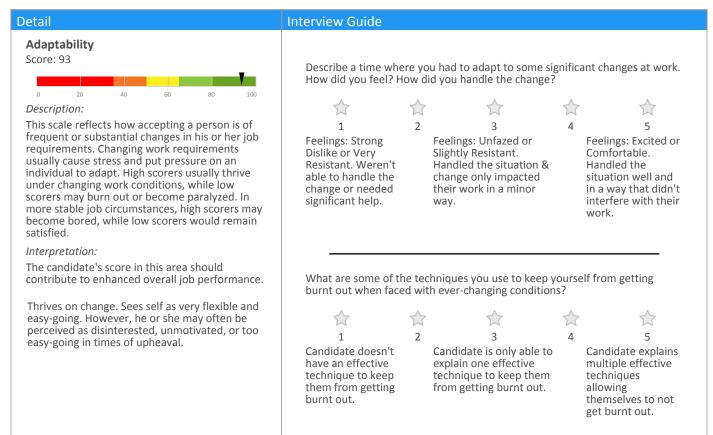

Detail	Interview Guide
Circuits Score: 74	Have you ever had any training in electrical circuits? Can you describe a project where you had to use them? $ \begin{array}{ccccccccccccccccccccccccccccccccccc$
Gears and Pulleys Score: 80 Description: Covers a basic understanding of how gears and pulleys function, and how they can provide leverage when lifting or moving heavy items. Interpretation: High scores in this area correlate with superior performance for many jobs. The candidate's score demonstrates a high level of knowledge of gears and pulleys.	Have you ever studied how gears and pulleys make our work easier? A A A A A 5 NA NA NA NA
Spatial Reasoning Score: 83 20 40 60 80 100 Description: Covers the ability to envision a change in the spatial orientation of a three dimensional object. Interpretation: High scores in this area correlate with superior performance for many jobs. The candidate's score demonstrates a high degree of spatial reasoning ability.	Can you describe a time when you had to envision something before it was actually built? How did it turn out? $ \begin{array}{ccccccccccccccccccccccccccccccccccc$
ToolsScore: 81020406080100Description:Evaluates recognition of various types of tools and their purposes.Interpretation:High scores in this area correlate with superior performance for many jobs.The candidate's score indicates a high degree of recognition of what various tools are used for.	Do you work with tools a lot? How did you get your knowledge of different tools?

Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

Detail

Drive

Description:

This scale reflects the degree to which an individual will work hard to achieve goals and solve critical problems in the organization. High scores on this scale indicate a person will be diligent in their work and use all necessary sources to solve problems. Low scores on this scale indicate a person may be unenthusiastic about work and may struggle with complex tasks and challenges.

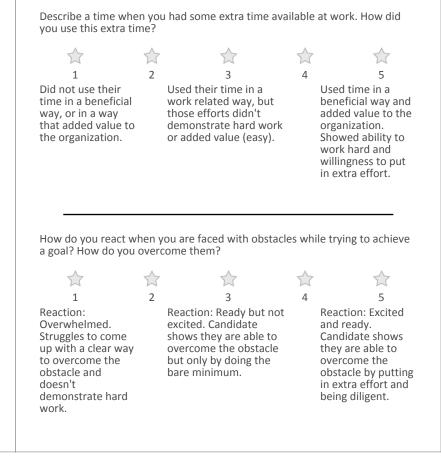

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Highly motivated by challenging goals and tasks, financial rewards, and/or recognition, and willing to work very hard to succeed. Very focused on understanding guidelines, following the rules and personal achievement.

Interview Guide

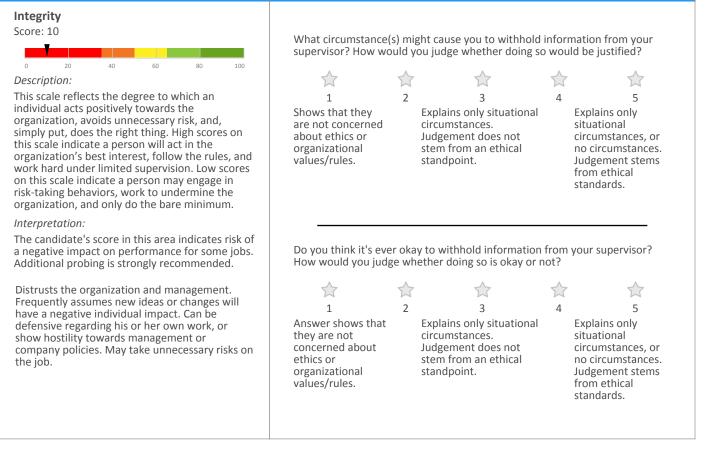

100

Interview Guide

Detail

Description:

This scale reflects the degree to which an individual can withstand adversity, bounce back from difficult events, and be persistent in doing work tasks despite difficulties that come their way. High scores on this scale indicate a person will likely be able to deal with difficult situations with ease, perceive they have control over events in their life, and continue to push forward to achieve goals. Low scores on this scale indicate a person may claim that mistakes/failures were out of their control. Low scorers tend to not cope well with on-the-job stress and don't put in the extra effort to achieve success when obstacles come their way.

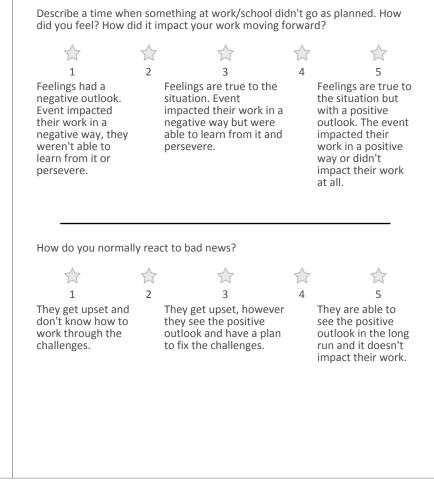

Please note that resilience is not a fixed trait. Unlike many other personality characteristics, resilience can be developed over time. Additionally, multiple factors can influence how resilient a person is within a specific situation. In recognition of these features, additional probing using suggested interview questions is strongly recommended.

Interpretation:

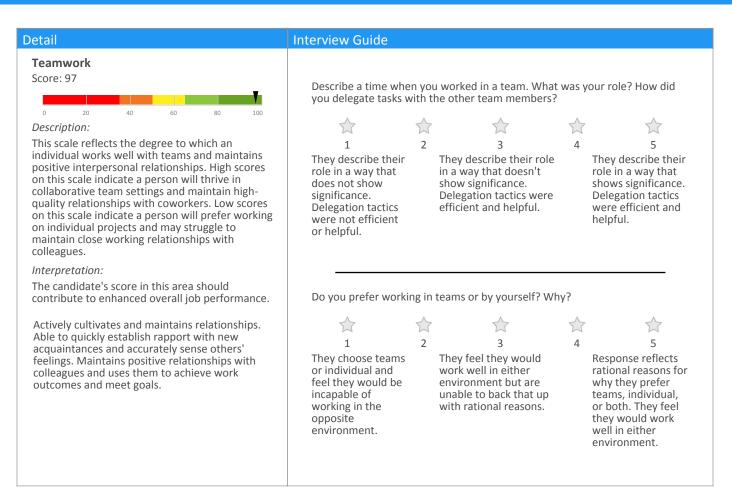

The candidate's score in this area should contribute to enhanced overall job performance.

Responses indicate that the candidate can effectively work through difficulties at work by exhibiting positive emotions and the ability to take control of events. Candidate can likely push forward to achieve their goals, even when obstacles come their way.

Interview Guide

Behavioral History Detail

This section evaluates answers the candidate gave concerning his or her work-related history. Studies often show that a candidate''s past behavior often indicates his or her future behavior. Potential caution areas (if any) are specified in each detail section.

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S.
 Federal Government U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit http://www.onetcenter.org.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Adaptability	93.6274	Z-Statistic	1.9085	6.5611
Analytical Thinking and Attention to Detail	66.2999	Z-Statistic	0.0867	5.3378
Basic Physics	83.6078	Z-Statistic	1.2405	8.2219
Circuits	74.2813	Z-Statistic	0.6188	8.2219
Drive	94.4584	Z-Statistic	1.9639	6.7985
Gears and Pulleys	80.8419	Z-Statistic	1.0561	8.2219
History Survey - Performance	71.4440	Z-Statistic	0.4296	9.8663
History Survey - Tenure	66.7464	Z-Statistic	0.1164	9.8663
Integrity	10.0000	Z-Statistic	-3.6667	7.3165
Resilience	74.4766	Z-Statistic	0.6318	6.7985
