Test Results and Interview Guide

The Workplace Simulation - Graduate Recruitment assessment measures key factors related to high performance and tenure in this job. Attribute types measured vary by test, but can include cognitive ability, skills, knowledge, personality characteristics, emotional intelligence, and past behavioral history. This report includes a one page summary, followed by detailed results with an embedded interview guide. Note that these results should always be used as a part of a balanced candidate selection process that includes independent evaluation steps, such as interviews and reference checks.

Overall

Candidate	Score	Interpretation
<div>Betty Penske bettypenske@yourcompany.org Workplace Simulation - Graduate Recruitment August 31, 2024 Summary: High Performance Potential</div>	84	<div><div>020406080100</div></div> <div><div>Key</div><div><div>▼</div> Candidate Score</div><div><div></div> Higher Risk</div><div><div></div> Lower Risk</div><div><div></div> Custom Baseline (Optional)</div></div>

Competency Summary

Competency	Score	Interpretation
Cognitive Abilities (relates to job performance, problem-solving, ability to learn, etc.)		
Memory / Attention to Detail / Logic & Reasoning	95	<div><div>020406080100</div></div>
Skills/Knowledge (relates to immediate readiness)		
Writing	73	<div><div>020406080100</div></div>

Comparison

Percentile scores indicate how the candidate compares to other test-takers within various groups. The candidate scored equal to or better than the fraction of test-takers indicated by the percentile.

Test-Taker Group	Percentile	0	10	20	30	40	50	60	70	80	90	100

Detail

Candidate:	Betty Penske, bettypenske@yourcompany.org
Assessment:	Workplace Simulation - Graduate Recruitment
Authorized:	August 31, 2024, by Susan Bookman, HR Avatar Data Collection Account, sue.bookman@richardson.biz
Started:	August 31, 2024, 5:45:14PM EST
Completed:	August 31, 2024, 5:45:14PM EST
Overall Score:	84

Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

Detail	Interview Guide
<p>Memory / Attention to Detail / Logic & Reasoning</p> <p>Score: 95</p> <div><div></div></div> <p><i>Description:</i></p> <p>This scale reflects how successful a person is at making sense of a set of data or facts through logical reasoning. High scorers understand causes and consequences by interpreting a given situation and predicting its outcomes. They are able to remember details and take action accordingly. Low scorers may burn out or become paralyzed. In more stable job circumstances, high scorers may become bored, while low scorers would remain satisfied. This scale also represents thoroughness, accuracy, and being concerned for all areas involved no matter how insignificant. Individuals who demonstrate high Attention to Detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details.</p> <p><i>Interpretation:</i></p> <p>High scores in this area correlate with superior performance for many jobs.</p> <p>Able to achieve a high degree of thoroughness and accuracy. Work requires little to no review or checking to maintain consistency. Can often solve difficult problems, plan many-featured tasks and projects, and organize multiple resources. Able to quickly recall and use information when needed or appropriate.</p>	<p>Can you give me an example of where your attention to detail or your thoughtful analysis of a situation helped make a project successful?</p> <div><div></div><div></div><div></div><div></div><div></div></div> <p>1 2 3 4 5</p> <p>Poor example. Does not show attention to detail or analytical ability.</p> <p>Moderately relevant or impactful example.</p> <p>Strongly relevant and clear example.</p> <hr/> <p>How do you handle a situation when you've messed up due to overlooking an important detail?</p> <div><div></div><div></div><div></div><div></div><div></div></div> <p>1 2 3 4 5</p> <p>Is unable to handle the situation.</p> <p>Demonstrates the ability to admit to their error and quickly fix the error but didn't put preventative systems in place.</p> <p>Demonstrates the ability to admit to their error, put preventative systems in place, and quickly fix the error.</p>

Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

Detail	Interview Guide
<p>Writing</p> <p>Score: 73</p>  <p><i>Description:</i></p> <p>The ability to be concise, friendly, and accurate when drafting email replies to customer service requests.</p> <p><i>Interpretation:</i></p> <p>Above-average writing skills can positively impact performance in many jobs.</p> <p>Above average. Conveys ideas in a concise and succinct format. See writing sample section of report for raw essay(s) submitted.</p> <ul style="list-style-type: none">• Raw computed score: 80• Computed score confidence: 75• Approximate Word Count: 247 <p>Please see below to view the essay submitted.</p>	<p>Are you comfortable when you need to express yourself through writing? Do you feel confident you can get the right message across? Tell me about a project or task where your writing skills were required for success. How did it go?</p> <div><div>★ 1 Not confident in own writing ability. Prefers speaking.</div><div>★ 2 Somewhat confident in own writing ability. Writes frequently.</div><div>★ 3 Very confident in ability to write. Has received compliments on clarity of written correspondences.</div><div>★ 4</div><div>★ 5</div></div>

Writing Sample(s)

During the assessment, the candidate was asked to write one or more passages. The text they wrote is included in the table below for review.

Writing Sample - Question	Response
Please write an essay describing the keys to creative writing.	<p>This is a sample essay. In a real test situation, the candidate or test taker would write an essay as a part of their assessment, in response to the question associated with this entry. All reports will share their writing as received. In some cases, our artificial intelligence engine will process their response to create a numerical score. Our system also checks for plagiarism, both among previously submitted essays, and the broader Internet. Additionally, spelling, grammar, and style checks are performed.</p> <p>Essay typically are from 150 to 600 words. They can be written in response to an explicit question, or they can be free-form responses to general questions.</p>

Identity Confirmation Photos

The following photos of the candidate and any identification were uploaded during the assessment session.

Photo Analysis Results			
- Risk:		Medium risk of cheating based on image inconsistencies	
- Percent match among processed faces		100%	
- Total images processed		17	
- Total images with valid faces		14 (82%)	
- Total pairs of faces compared		13	
- Pairs in which faces matched		13 (100%)	
			
Pre/Post-Test Photo	ID Photo	In-Test Error Detected (No Face Detected)	In-Test Error Detected (No Face Detected)
			
In-Test Error Detected (No Face Detected)	In-Test Photo	In-Test Photo	In-Test Photo
			
In-Test Photo	Pre/Post-Test Photo		

Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- Sim ID: 15941-1, Key: 0-0, Rpt: 13, Prd: 6804, Created: 2024-08-31 22:45 UTC

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.

Competency	Score	How applied to overall	Score Value Used	Weight (%)
Memory / Attention to Detail / Logic & Reasoning	95.6541	Z-Statistic	2.0436	50.0000
Writing	73.3228	Z-Statistic	0.5549	50.0000
Weighted Average of Competency Z-Scores:				1.2992
Mean applied to Raw Weighted Avg:				0.0000
Standard Deviation applied to Raw Weighted Avg:				1.0000
Normalized Raw Score:				1.2992
Mean:				65.0000
Standard Deviation Used:				15.0000
Final Overall Score:				84.4884
