## Cognitive Abilities Detail

This section contains a list of job-related cognitive abilities that have been evaluated in a job-like context using simulation technology. Studies have demonstrated that cognitive abilities are highly correlated with job performance for many jobs. Abilities also correlate with problem-solving and the ability to learn quickly.

### Detail

### Interview Guide

#### Analytical Thinking and Attention to Detail

Score: 85

##### Description:

This scale indicates both the capacity to think in a thoughtful, discerning way, to solve problems, utilize resources, analyze data, and apply attention to detail. Individuals who demonstrate high amounts of analytical thinking are able to recognize patterns rapidly, navigate through problems, and resolve difficult problems systematically. Individuals who demonstrate high attention to detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details.

##### Interpretation:

High scores in this area correlate with superior performance for many jobs.

Able to think in a thoughtful, discerning way. Can often solve difficult problems, plan many-featured tasks and projects, organize multiple resources, and analyze complex data. Able to quickly recall and use information when needed or appropriate. Additionally, able to achieve a high degree of thoroughness and accuracy in a work task. Concerned for all areas involved. Work products require little or no review or checking to maintain consistency.

Can you give me an example of where your attention to detail or your thoughtful analysis of a situation helped make a project successful?

1

Poor example. Does not show attention to detail or analytical ability.

2

Moderately relevant or impactful example.

3

4

5

Strongly relevant and clear example.

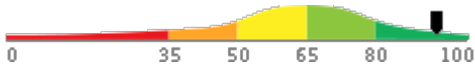

## Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

**Detail** **Interview Guide**

### Consumer Finance-Related Accounting Concepts

Score: 93

**Description:**

Evaluates the candidate's knowledge of the consumer finance-related accounting principles, with an aim to determine the degree of training that will be required before the candidate can be expected to become productive.

**Interpretation:**

Candidate should achieve superior job performance in this area with little or no training.

Scores indicate a solid working knowledge of consumer finance-related accounting principles. Candidate is likely ready to be productive without basic training or with immediate entry into advanced training. Likely to be able to mentor others.

Tell me about a project or task where your knowledge of Consumer Finance was required for success. How did it go?

Example didn't require or demonstrate knowledge.

Knowledge was only moderately important or moderately demonstrated in example.

Clearly relevant application and demonstration of knowledge.

### Writing

Score: 82

**Description:**

The ability to be concise, friendly, and accurate when drafting written communications.

**Interpretation:**

Superior writing skills can positively impact performance in many jobs.

Significantly above average. Conveys ideas accurately in a clear, concise and succinct format. See writing sample section of report for raw essay(s) submitted.

- Raw computed score: 80
- Computed score confidence: 75
- Approximate Word Count: 247

Please see below to view the essay submitted.

Are you comfortable when you need to express yourself through writing? Do you feel confident you can get the right message across? Tell me about a project or task where your writing skills were required for success. How did it go?

Not confident in own writing ability. Prefers speaking.

Somewhat confident in own writing ability. Writes frequently.

Very confident in ability to write. Has received compliments on clarity of written correspondences.

## Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

### Detail

### Interview Guide

#### Adaptability

Score: 95

##### Description:

This scale reflects how accepting a person is of frequent or substantial changes in his or her job requirements. Changing work requirements usually cause stress and put pressure on an individual to adapt. High scorers usually thrive under changing work conditions, while low scorers may burn out or become paralyzed. In more stable job circumstances, high scorers may become bored, while low scorers would remain satisfied.

##### Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Thrives on change. Sees self as very flexible and easy-going. However, he or she may often be perceived as disinterested, unmotivated, or too easy-going in times of upheaval.

Describe a time where you had to adapt to some significant changes at work. How did you feel? How did you handle the change?

1

Feelings: Strong Dislike or Very Resistant. Weren't able to handle the change or needed significant help.

2

Feelings: Unfazed or Slightly Resistant. Handled the situation & change only impacted their work in a minor way.

3

4

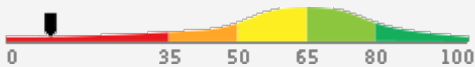

Feelings: Excited or Comfortable. Handled the situation well and in a way that didn't interfere with their work.

5

#### Integrity

Score: 10

##### Description:

This scale reflects the degree to which an individual acts positively towards the organization, avoids unnecessary risk, and, simply put, does the right thing. High scores on this scale indicate a person will act in the organization's best interest, follow the rules, and work hard under limited supervision. Low scores on this scale indicate a person may engage in risk-taking behaviors, work to undermine the organization, and only do the bare minimum.

##### Interpretation:

The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.

Distrusts the organization and management. Frequently assumes new ideas or changes will have a negative individual impact. Can be defensive regarding his or her own work, or show hostility towards management or company policies. May take unnecessary risks on the job.

What circumstance(s) might cause you to withhold information from your supervisor? How would you judge whether doing so would be justified?

1

Shows that they are not concerned about ethics or organizational values/rules.

2

Explains only situational circumstances. Judgement does not stem from an ethical standpoint.

3

4

Explains only situational circumstances, or no circumstances. Judgement stems from ethical standards.

5

**Detail**

**Interview Guide**

**Drive**

Score: 93

*Description:*

This scale reflects the degree to which an individual will work hard to achieve goals and solve critical problems in the organization. High scores on this scale indicate a person will be diligent in their work and use all necessary sources to solve problems. Low scores on this scale indicate a person may be unenthusiastic about work and may struggle with complex tasks and challenges.

*Interpretation:*

The candidate's score in this area should contribute to enhanced overall job performance.

Highly motivated by challenging goals and tasks, financial rewards, and/or recognition, and willing to work very hard to succeed. Very focused on understanding guidelines, following the rules and personal achievement.

How do you respond when the going gets tough and it seems like you and your team are facing a nearly impossible task?

1

They are unenthusiastic. They respond by working to their expectations or less due to being overwhelmed.

2

Their feelings are neutral. They respond by working hard to achieve the goal.

3

4

They are enthusiastic. They respond by working hard to achieve the goal and by using all necessary sources.

5

**Detail**

**Interview Guide**

**Resilience**

Score: 96

*Description:*

This scale reflects the degree to which an individual can withstand adversity, bounce back from difficult events, and be persistent in doing work tasks despite difficulties that come their way. High scores on this scale indicate a person will likely be able to deal with difficult situations with ease, perceive they have control over events in their life, and continue to push forward to achieve goals. Low scores on this scale indicate a person may claim that mistakes/failures were out of their control. Low scorers tend to not cope well with on-the-job stress and don't put in the extra effort to achieve success when obstacles come their way.

Please note that resilience is not a fixed trait. Unlike many other personality characteristics, resilience can be developed over time. Additionally, multiple factors can influence how resilient a person is within a specific situation. In recognition of these features, additional probing using suggested interview questions is strongly recommended.

*Interpretation:*

The candidate's score in this area should contribute to enhanced overall job performance.

Responses indicate that the candidate can effectively work through difficulties at work by exhibiting positive emotions, having control over the events, being proactive, remaining hopeful, and learning from the experience. Candidate can always be expected to push forward to achieve their goals, even when obstacles come their way.

How do you normally react to bad news?

They get upset and don't know how to work through the challenges.

They get upset, however they see the positive outlook and have a plan to fix the challenges.

They are able to see the positive outlook in the long run and it doesn't impact their work.

**Detail**

**Interview Guide**

**Teamwork**

Score: 95

*Description:*

This scale reflects the degree to which an individual works well with teams and maintains positive interpersonal relationships. High scores on this scale indicate a person will thrive in collaborative team settings and maintain high-quality relationships with coworkers. Low scores on this scale indicate a person will prefer working on individual projects and may struggle to maintain close working relationships with colleagues.

*Interpretation:*

The candidate's score in this area should contribute to enhanced overall job performance.

Actively cultivates and maintains relationships. Able to quickly establish rapport with new acquaintances and accurately sense others' feelings. Maintains positive relationships with colleagues and uses them to achieve work outcomes and meet goals.

Describe a time when you were faced with a conflict while working on a team. How did you handle it?

1

They are unable to appropriately handle conflicting circumstances while working on a team.

2

They are able to handle conflicting circumstances by being a team player, showing empathy, OR problem solving as a group.

3

4

They are able to handle conflicting circumstances by being a team player, showing empathy, AND problem solving as a group.

5

## Emotional Intelligence Detail

This section contains a list of emotional intelligence characteristics that indicate how tuned in a candidate is to his or her own emotions, and those of others, as well as the candidate's ability to control his or her behavior in light of the emotions he or she is experiencing. These traits can often impact performance in groups or teams. Sample interview questions are provided to gather more information.

**Detail** Interview Guide

### Empathy and Emotional Self-Control

Score: 63

*Description:*

This scale reflects both the ability to sense and understand other people's feelings, feel sympathy for others, and see things from other people's point of view, and the ability to manage the desire to satisfy urges or impulses, showing restraint and managing behaviors to ensure appropriate and effective interactions with others.

*Interpretation:*

The candidate's score in this area indicates neither a positive nor a negative impact on performance.

Demonstrates moderate strength in sensing the emotional needs of others, sympathizing with other people's problems, and seeing things from other people's point of view. Likely to generally be effective at demonstrating to customers or coworkers that they understand and care about them, maintaining current levels of customer loyalty, work relationships, and conflict in the workplace.

What do you typically do when you are working closely with someone who is very upset?

1

They have an inappropriate response and don't demonstrate understanding or care.

2

They (1) have an appropriate response and (2) demonstrate understanding but unable to show the customer that they care.

3

4

They (1) have an appropriate response (2) demonstrate understanding and (3) show the customer that they care.

5

## Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at [www.hravatar.com](http://www.hravatar.com).
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O\*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O\*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O\*NET, visit <http://www.onetcenter.org>.

## Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.
