Interview Guide

Analytical Thinking and Attention to Detail

Score: 96

Description:

This scale indicates both the capacity to think in a thoughtful, discerning way, to solve problems, utilize resources, analyze data, and apply attention to detail. Individuals who demonstrate high amounts of analytical thinking are able to recognize patterns rapidly, navigate through problems, and resolve difficult problems systematically. Individuals who demonstrate high attention to detail produce work products that are consistently accurate and require little checking. They rarely forget schedule commitments or overlook even the smallest details.

Interpretation:

High scores in this area correlate with superior performance for many jobs.

Able to think in a thoughtful, discerning way. Can often solve difficult problems, plan many-featured tasks and projects, organize multiple resources, and analyze complex data. Able to quickly recall and use information when needed or appropriate. Additionally, able to achieve a high degree of thoroughness and accuracy in a work task. Concerned for all areas involved. Work products require little or no review or checking to maintain consistency.

Can you give me an example of where your attention to detail or your thoughtful analysis of a situation helped make a project successful?

1

Poor example. Does not show attention to detail or analytical ability.

2

Moderately relevant or impactful example.

3

4

Strongly relevant and clear example.

5

How do you handle a situation when you've messed up due to overlooking an important detail?

1

Is unable to handle the situation.

2

Demonstrates the ability to admit to their error and quickly fix the error, but didn't put preventative systems in place.

3

4

Demonstrates the ability to admit to their error and quickly fix the error, but didn't put preventative systems in place.

5

Knowledge and Skills Detail

This section contains a list of job-related knowledge areas and skills that have been evaluated. Low scores in these areas often indicate that additional learning may be required before top performance can be achieved.

Clear description of project and spreadsheet / Excel knowledge.

2

Weak description of project and/or knowledge of tool.

3

4

Little or no experience with spreadsheets.

5

Personality Characteristics Detail

This section contains a list of personality characteristics that are frequently associated with job performance. Remember, these are not skills and do not indicate the ability to do a job. Rather, they can be used to evaluate the candidate's fit with the general needs of the job and the organizational culture. Sample interview questions are provided to gather more information.

Detail

Interview Guide

Adaptability

Score: 79

Description:

This scale reflects how accepting a person is of frequent or substantial changes in his or her job requirements. Changing work requirements usually cause stress and put pressure on an individual to adapt. High scorers usually thrive under changing work conditions, while low scorers may burn out or become paralyzed. In more stable job circumstances, high scorers may become bored, while low scorers would remain satisfied.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Prefers a dynamic work environment. Able to remain focused and positive in times of significant workplace change. Fairly easy-going and relaxed. However, may appear uninterested under certain circumstances.

Describe a time where you had to adapt to some significant changes at work. How did you feel? How did you handle the change?

1

Feelings: Strong Dislike or Very Resistant. Weren't able to handle the change or needed significant help.

2

Feelings: Unfazed or Slightly Resistant. Handled the situation & change only impacted their work in a minor way.

3

4

Feelings: Excited or Comfortable. Handled the situation well and in a way that didn't interfere with their work.

5

What are some of the techniques you use to keep yourself from getting burnt out when faced with ever-changing conditions?

1

Candidate doesn't have an effective technique to keep them from getting burnt out.

2

Candidate is only able to explain one effective technique to keep them from getting burnt out.

3

4

Candidate explains multiple effective techniques allowing themselves to not get burnt out.

3

4

Reaction: Excited and ready. Candidate shows they are able to overcome the obstacle by putting in extra effort and being diligent.

5

Describe a time when you had some extra time available at work. How did you use this extra time?

1

Did not use their time in a beneficial way, or in a way that added value to the organization.

2

Used their time in a work related way, but those efforts didn't demonstrate hard work or added value (easy).

3

4

Used time in a beneficial way and added value to the organization. Showed ability to work hard and willingness to put in extra effort.

5

Detail

Interview Guide

Integrity

Score: 10

Description:

This scale reflects the degree to which an individual acts positively towards the organization, avoids unnecessary risk, and, simply put, does the right thing. High scores on this scale indicate a person will act in the organization's best interest, follow the rules, and work hard under limited supervision. Low scores on this scale indicate a person may engage in risk-taking behaviors, work to undermine the organization, and only do the bare minimum.

Interpretation:

The candidate's score in this area indicates risk of a negative impact on performance for some jobs. Additional probing is strongly recommended.

Distrusts the organization and management. Frequently assumes new ideas or changes will have a negative individual impact. Can be defensive regarding his or her own work, or show hostility towards management or company policies. May take unnecessary risks on the job.

What circumstance(s) might cause you to withhold information from your supervisor? How would you judge whether doing so would be justified?

1

Shows that they are not concerned about ethics or organizational values/rules.

2

Explains only situational circumstances. Judgement does not stem from an ethical standpoint.

3

4

Interview Guide

Resilience

Score: 82

Description:

This scale reflects the degree to which an individual can withstand adversity, bounce back from difficult events, and be persistent in doing work tasks despite difficulties that come their way. High scores on this scale indicate a person will likely be able to deal with difficult situations with ease, perceive they have control over events in their life, and continue to push forward to achieve goals. Low scores on this scale indicate a person may claim that mistakes/failures were out of their control. Low scorers tend to not cope well with on-the-job stress and don't put in the extra effort to achieve success when obstacles come their way.

Please note that resilience is not a fixed trait. Unlike many other personality characteristics, resilience can be developed over time. Additionally, multiple factors can influence how resilient a person is within a specific situation. In recognition of these features, additional probing using suggested interview questions is strongly recommended.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Responses indicate that the candidate can effectively work through difficulties at work by exhibiting positive emotions, having control over the events, being proactive, remaining hopeful, and learning from the experience. Candidate can always be expected to push forward to achieve their goals, even when obstacles come their way.

Tell me about a time you tried to reach an aggressive goal that you failed to achieve. What was the reason you missed the goal?

1

Their answer revolves around outside forces (boss, economy, coworkers, etc.) They do not take responsibility.

2

Their answer is a mix of what they could have done better and how others could have helped impact their goal.

3

4

5

Their answer revolves around them and what they could have done better to set themselves up and achieve the goal.

Describe a time when something at work/school didn't go as planned. How did you feel? How did it impact your work moving forward?

1

Feelings had a negative outlook. Event impacted their work in a negative way, they weren't able to learn from it or persevere.

2

Feelings are true to the situation. Event impacted their work in a negative way but were able to learn from it and persevere.

3

4

Feelings are true to the situation but with a positive outlook. The event impacted their work in a positive way or didn't impact their work at all.

Teamwork

Score: 97

Description:

This scale reflects the degree to which an individual works well with teams and maintains positive interpersonal relationships. High scores on this scale indicate a person will thrive in collaborative team settings and maintain high-quality relationships with coworkers. Low scores on this scale indicate a person will prefer working on individual projects and may struggle to maintain close working relationships with colleagues.

Interpretation:

The candidate's score in this area should contribute to enhanced overall job performance.

Actively cultivates and maintains relationships. Able to quickly establish rapport with new acquaintances and accurately sense others' feelings. Maintains positive relationships with colleagues and uses them to achieve work outcomes and meet goals.

Describe a time when you were faced with a conflict while working on a team. How did you handle it?

1

They are unable to appropriately handle conflicting circumstances while working on a team.

2

They are able to handle conflicting circumstances by being a team player, showing empathy, OR problem solving as a group.

3

4

5

They are able to handle conflicting circumstances by being a team player, showing empathy, AND problem solving as a group.

Do you prefer working in teams or by yourself? Why?

1

They choose teams or individual and feel they would be incapable of working in the opposite environment.

2

They feel they would work well in either environment but are unable to back that up with rational reasons.

3

4

5

Response reflects rational reasons for why they prefer teams, individual, or both. They feel they would work well in either environment.

Emotional Intelligence Detail

This section contains a list of emotional intelligence characteristics that indicate how tuned in a candidate is to his or her own emotions, and those of others, as well as the candidate's ability to control his or her behavior in light of the emotions he or she is experiencing. Report Preparation Notes

- Hiring decisions should never be based on a single source of information. The most effective use of this assessment report is as a part of a multi-faceted program of candidate evaluation that includes resume review, interviews, and reference checks.
- Overall vs Percentiles Scores: The overall score reflects the success in the test, based on the mean (average) and standard deviation of the test scores. The percentile score reflects the percentage of test-takers who scored equal or below this overall score. We recommend you use the Overall Score as your primary evaluation criteria. However, percentile scores can often be useful in comparing specific candidates against one another and with a group, such as for test takers in a certain organization or within a certain account.
- Note that comparison information is calculated based on completed instances of this assessment at that time the assessment is scored. As additional instances are completed, the comparative data may change. You can always update a report to the current values by clicking on 'Recalculate Percentiles' within the online results viewing pages at www.hravatar.com.
- Most competency scores are norm-based, which means that they can be interpreted in terms of their distance from the average or mean score. For all scales, a score equal to the mean receives a score of 65 and scores above and below this value are set so that a score change of 15 equals one standard deviation.
- For linear competencies, higher is better across the entire scale. For these scales a score between 65 and 80 (light green) represents 0 to 1 standard deviation above the mean and a score above 80 (dark green) represents more than one standard deviation above the mean. Similarly, a score of 50 - 65 (yellow) represents 0 to 1 standard deviation below the mean, while a score of 35 - 50 (orange) equates to 1 to 2 standard deviations below the mean, and a score below 35 represents more than 2 standard deviations below the mean.
- This assessment makes use of data from the Occupational Information Network (O*NET), which is funded by the U.S. Federal Government - U.S. Department of Labor/Employment and Training Administration (USDOL/ETA) - as a primary source of occupational information. The O*NET database contains information on hundreds of standardized and occupation-specific descriptors that are continually updated by ongoing research. These data are used in preparing descriptive information as well as setting relative weights between competencies used in calculating the overall score. For additional information about O*NET, visit <http://www.onetcenter.org>.

Score Calculation Detail

The following table provides a summary of how the overall score was calculated from the individual competency scores. Competency scores are calculated on a 0-100 scale by first calculating a Z statistic based on test-taker responses and then transforming the Z value to a scale with target mean and standard deviation. Certain competencies have a normal score distribution where it is best to be closest to the mean. For these competencies we modify the Z statistic by multiplying its absolute value by minus 1 for the overall score calculation. Next, to calculate the overall score, a weighted average of all modified competency Z statistics is computed and this weighted average is itself transformed to a Z statistic, which is then transformed to a score with the same target mean and standard deviation. Finally outlier scores are adjusted if they are below 0 or above 100.
